Professor Rui Cunha Marques

Global Leader in Local Government Sustainability, Instituto Superior Técnico, Portugal

About ANZSEE

ANZSEE is a regional chapter of the International Society for Ecological Economics. Ecological Economics recognises that economies are embedded and dependent upon the ecosphere; it is the mandate of ANZSEE, in conjunction with ISEE, to encourage scientific research on the integration of economics, ecology and related disciplines, and to promote the general understanding of the results of that research through education, policy analysis, communication and other appropriate means.
